The Resettlement of Hasankeyf: Today, tomorrow, next week, next year

Malla Grönqvist
Visiting Scholar at SRII

In this research seminar I will talk about the fieldwork that I have done for my Master's thesis in social anthropology. The aim of my Master's research project is to offer an anthropological perspective on the process of resettling the town of Hasankeyf that is going to be covered by the Ilisu Dam. I focus on the State Hydraulic Works' (Devlet Su İşleri; DSİ) way of carrying out this resettlement project and the townspeople's experience of the process. Thereby I seek to theorize on the relationship between the townspeople and the state in this context.
